# HOW DIRTY IS A CELL PHONE?

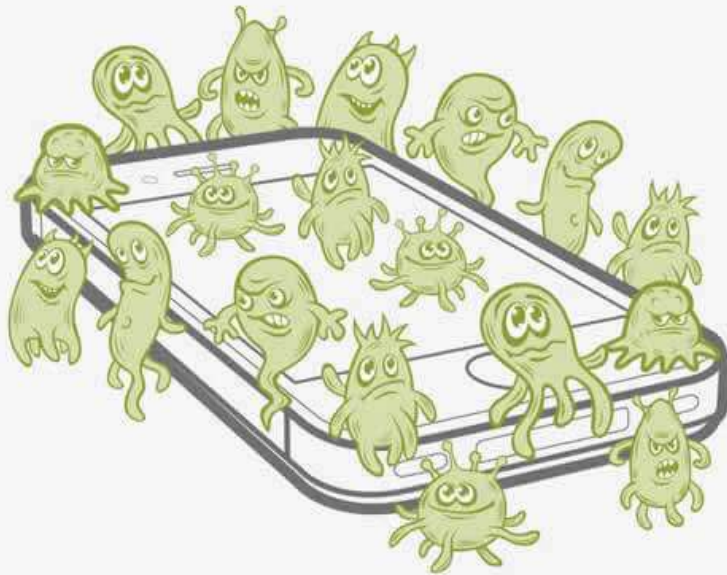

Our phones are filthy and it's not hard to see why.

Lets face it, we are always touching dirty things. The problem is, we are also always touching our phones, transferring that bacteria to our devices! We wash our hands, but never clean our phones! Have you ever used your phone in the bathroom? (Don't worry, we all have.) Then it shouldn't surprise you that 1 in 6 cell phones have fecal matter on them!

**DIRTIER**  
THAN YOU THINK!

VS

A CELL PHONE HAS  
**18 TIMES**  
MORE BACTERIA

**THAN A  
PUBLIC  
RESTROOM**

# WARMTH BREEDS BACTERIA

PHONES ARE WARM AND WE KEEP THEM IN WARM PLACES

**Phones are  
warm, making  
it easy for bacteria  
to multiply and  
spread.**

**GERM  
BREEDING  
GROUND**

A stylized illustration of a smartphone with a black outline. The screen is white and displays the text 'GERM BREEDING GROUND' in a bold, green, sans-serif font. The phone is surrounded by several green splatters of varying sizes, suggesting bacteria or germs. The phone has a small notch at the top and a circular home button at the bottom.
